

Equity Financing program for enterprises of SMEs

Equity Financing mechanisms provide businesses with ample opportunities to accumulate capital sources for realization and management of large-scale projects

In the scope of Equity Financing program (EFP) purchasing of stocks or indirect investments are planned aimed at financing of production capabilities and production new lines expansion in SMEs.

Equity financing is executed for the amounts needed for the implementation of the projects having the confirmation of the board of trustees of AIF. Stocks or indirect investments under this program are not mean providing the loan investments, but is based on a balance sheet or market share price growth and the expected Dividend principle of the business profits .

Within 3-5 years after the project starts the share is to be sold by the simple social demand method.
